Applicant DR. JOHANNES HEIDENHAIN GMBH et al	

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

JP,US

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

EP

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

I. Basis of the report

1. This report has been drawn on the basis of (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

- ☐ the international application as originally filed.
- ☒ the description, pages 3-6, 8-12, as originally filed,
 pages _____, filed with the demand,
 pages 1, 2, 2a, 7, 7a, filed with the letter of 30 October 2000 (30.10.2000),
 pages _____, filed with the letter of _____.
- ☒ the claims, Nos. _____, as originally filed,
 Nos. _____, as amended under Article 19,
 Nos. _____, filed with the demand,
 Nos. 1-24, filed with the letter of 30 October 2000 (30.10.2000),
 Nos. _____, filed with the letter of _____.
- ☒ the drawings, sheets/fig 1/4-4/4, as originally filed,
 sheets/fig _____, filed with the demand,
 sheets/fig _____, filed with the letter of _____,
 sheets/fig _____, filed with the letter of _____.

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/fig _____

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).

4. Additional observations, if necessary:

2. Citations and explanations

1. This report makes reference to the following search report citation; the same numbering will be used in the further proceedings:

D1: EP-A-0 661 543 (BOEHRINGER ANDREAS), 5 July 1995 (1995-07-05).

2. The present application concerns a method (Claim 1) and device (Claim 13) for generating a signal with very good dynamic quality for accelerating a rotor of an electrical drive mechanism. A method of this type is known from D1, which describes measures allowing the relative position and angular acceleration signal generators to be rigidly interconnected and hence a directly interdependent set of state variables to be obtained.

The invention addresses the problem of eliminating the influence of measurement delays and oscillations on the measurement signal. This is achieved by providing a replacement variable generated by filtering the measurement signals through a low-pass or specially designed high-pass filter, then totalling them. The prior art does not disclose such

an evaluation method or evaluation circuit. The subject matter of independent Claims 1 and 13 therefore meets the requirements of PCT Article 33(2) and (3) for novelty and inventive step.

3. The remaining claims are dependent on Claims 1 and 13 and therefore also meet the requirements of PCT Article 33(2) and (3).

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

In the original set of claims and in the description, a special high-pass filter was presented as essential. In particular, two embodiments were disclosed (see, for example, the original Claim 1 regarding the general high-pass transmission function, and Claim 11 regarding the special high-pass transmission function). The present independent claims do not concern either of these two embodiments, but rather enable any transmission functions. Such an extension is not supported by the original documents, and therefore the requirements of PCT Article 34(2)(b) are not met.
